

Alabama Fire College - Workplace Safety Training

Hazardous Waste Site Worker Course

(40-hour HAZWOPER course)

The training prepares workers to enter and work safely on a wide range of contaminated sites. The course satisfies the off-site training requirements for the general site worker outlined in the OSHA HAZWOPER Standard [29 CFR 1910.120(e)] and includes these topics:

- OSHA regulations
- Site Safety Plans
- Natural, Chemical, Physical and Safety and Health Hazards
- Hazard Risk and Assessment Procedures
- Air Monitoring
- Controlling Hazards
- Personal Protective Equipment
- Decontamination
- Spill Control
- Emergency Planning and Response
- Site Assessment and Sampling
- Site Control
- Safe Excavations
- Confined Space Safety
- Control of Hazardous Energy
- Handling Containers
- Heavy Equipment Hazards

The course is designed for the following people:

- Environmental Consultants
 - Safety Officers
 - Site assessment workers
 - Project managers
 - Site cleanup
 - Remediation workers
 - Heavy equipment operators
 - Drillers
 - Regulatory Inspectors
 - Hazardous Waste Shippers and Haulers
- and many other occupations...*
